Table of Contents

Plenary lecture

Χάος – An adventure in chaos
J. Argyris, G. Faust and M. Haase 997

Stability of physical systems, Chaos

Nonlinear dynamics of a two-body nonlinear mechanical system
J. Awrejcewicz 1093

The Hopf bifurcation and limit cycle by the incremental harmonic balance method
S.L. Lau and S.W. Yuen 1109

Numerical simulation of solid–liquid phase change phenomena
M. Costa, A. Oliva, C.D. Pérez Segarra and R. Alba 1123

Ideal magnetohydrodynamic stability computations for three-dimensional magnetic fusion devices
R. Gruber, S. Merazzi, W.A. Cooper, G.Y. Fu, U. Schwenn and D.V. Anderson 1135

Numerical methods in physics

Control point forms for interactive grid manipulation
P.R. Eiseman 1151

Numerical method for viscous hydrodynamic problems with dynamic contact lines
P.J. Shopov and I.Bl. Bazhlekov 1157

Modeling and simulation of separating mixture flows
M. Ungarish 1175

Boundary elements for the solution of Navier–Stokes equations
A. Alujevic, G. Kuhn and P. Skerget 1187

Numerical simulation of the thermal behaviour of heat exchangers and storage devices using multilevel and ADI techniques
R. Alba, A. Oliva, C.D. Pérez Segarra and M. Costa 1203

To the calculation of low frequency oscillations of the Earth core
S. Diakonov 1219

Mathematical foundations

Analytical and numerical developments in 3D boundary element methods for elastic problems
W.L. Wendland 1229

Mathematical foundation of adaptive boundary element methods
D. Yu 1237

Spectral methods for high order equations
I. Mercader, M. Net and A. Falques 1245

A finite element alternating method for evaluation of stress intensity factors for part-circular cracks subjected to arbitrary loadings
C.Y. Liao and S.N. Atluri 1253

On some imbedding methods applied to fluid dynamics and electro-magnetics
C. Atamian, G.V. Dinh, R. Glowinski, J. He and J. Periaux 1271

Fundamental solutions of the Laplace operator and of Navier's elasticity operator for Riemann surfaces with two branch points
U. Heise 1301

A new methodology of evaluation of C^0 bending finite elements
J. Rakowski 1327

On the essential mechanical boundary conditions in two-field finite element approximations
M. Berković and Z. Drašković 1339

Software

A database design technique for finite element analysis
Y. Xingjian 1357

Static and dynamic analysis of collapse behaviour of steel structures
A. Wada and H. Kubota 1365

A software system for standard presentation of flow fields in computational fluid dynamic
I.V. Orlov and V.L. Yumashev 1379

Multibody dynamics

Analytical dynamics of multibody systems
P. Maißer 1391

Industrial applications of linear/nonlinear dynamics of multibody systems
G. Kocher 1397

Dynamical equations in natural coordinates
H. Brauchli and R. Weber 1403

Author index 1415

Subject index 1419

Instructions to authors 1425
